# Pilatus PC-12/45

Welcome to the world of aviation excellence, where the Pilatus PC-12 reigns as a true embodiment of versatility and reliability. With its renowned reputation and timeless design, we proudly present to you a remarkable opportunity to acquire a meticulously maintained 1999 Pilatus PC-12/45 aircraft. Piper Germany, on behalf of our esteemed client, invites you to explore the boundless horizons and unmatched capabilities that this exceptional aircraft has to offer.

The Pilatus PC-12 is a testament to the ingenuity and craftsmanship of the renowned Swiss manufacturer, Pilatus Aircraft. This marvel of engineering seamlessly blends the qualities of a turboprop with the versatility of a multi-purpose aircraft, making it an ideal choice for a wide range of missions. Whether you're seeking a private travel solution, a corporate transport, or an executive shuttle, the PC-12 effortlessly caters to your unique needs. The year 1999 marks the vantage point for this particular PC-12, a testament to its enduring value and steadfast performance. Through meticulous care and maintenance, our client has preserved the aircraft's pristine condition, ensuring its reliability and longevity for discerning aviation enthusiasts like yourself.

Piper Germany takes great pride in presenting this extraordinary opportunity to own a Pilatus PC-12. Our commitment to excellence and customer satisfaction ensures a seamless buying experience, where we strive to exceed your expectations at every turn.

Contact Piper Germany today to arrange a personal viewing and discover firsthand the allure of the Pilatus PC-12. Let us be your trusted partner on this remarkable journey.

# Exterior.

[ ]

Let's take a closer look at the exterior of D-FRAM, which boasts a stylish and attention-grabbing color scheme. This aircraft is designed to turn heads with its simple yet impactful combination of colors.

The top of the aircraft is painted in a clean and crisp white. This classic choice not only gives the aircraft a timeless look but also helps to reflect sunlight, keeping the cabin cooler during those hot summer days.

On the lower part of the fuselage, you'll find a light blue color that creates a sense of calm and serenity. It adds a touch of uniqueness to the PC-12's appearance, setting it apart from other aircraft in the sky.

Adding a touch of flair, two accent stripes run along the length of the aircraft. One of them is silver, while the other is gold. These stripes start at the propeller hub and extend towards the rear of the plane. They provide a subtle contrast to the white and blue colors, giving the PC-12 a sleek and sophisticated look.

The combination of the white top, light blue fuselage, and silver and gold accent stripes gives the Pilatus a distinctive and eye-catching appearance. It's a down-to-earth yet stylish choice that will make you stand out wherever you fly.

Experience the allure of the Pilatus PC-12's exterior as it gracefully takes to the skies. With its tasteful color scheme, this aircraft embodies a sense of confidence and style that will surely impress both aviation enthusiasts and onlookers alike.

## Versatility.

The Pilatus PC-12 is renowned for its remarkable versatility, thanks to its innovative cargo door. This feature revolutionizes transportation, effortlessly transitioning between passenger and cargo missions. With a spacious cabin accommodating up to six passengers, the PC-12 ensures a comfortable and luxurious travel experience. Additionally, the cargo door enables efficient loading and unloading, making it an ideal choice for transporting goods, equipment, or medical supplies. Seamlessly switching between configurations, the PC-12 optimizes operations without compromising safety or performance. From business travel to humanitarian missions, the PC-12's cargo door enhances capabilities and streamlines operations. Experience the transformative power of the PC-12, where the cargo door opens the gateway to endless possibilities in a versatile aircraft.

# Specification & Performance.

The 1999 PC-12/45 is an aircraft that embodies excellence, offering remarkable specifications and performance capabilities. Notably, its range, speed, and short landing distance make it an ideal choice for missions spanning from Germany across Europe.

With an impressive range of approximately 1,833 nautical miles (3,394 kilometers), D-FRAM allows you to seamlessly traverse the vast expanse of European skies. Its exceptional fuel efficiency ensures that you can reach remote destinations with ease, all while enjoying the comfort and convenience of this versatile aircraft.

The PC-12 boasts a cruise speed of around 260 knots (480 kilometers per hour), enabling swift and efficient travel across long distances. This speed capability ensures that you can reach your destination in a timely manner, whether it's for business, leisure, or other missions throughout Europe.

What sets the Pilatus apart is its ability to land on short runways, requiring a mere 2,783 feet (848 meters) of landing distance. This remarkable feature allows access to airports and airfields that may be limited in size or have challenging runway conditions. It expands the aircraft's operational flexibility, enabling you to reach remote and hard-to-reach locations without compromising on performance or safety.

The PC-12's exceptional performance and versatility make it suitable for a wide range of missions. From executive travel and cargo transportation to medical evacuation and aerial surveying, this aircraft offers unparalleled adaptability. With its spacious cabin accommodating up to six passengers, you can enjoy a comfortable and luxurious travel experience while efficiently completing your missions throughout Europe.

# Cockpit.

# Avionics.

This PC-12 boasts a comprehensively upgraded suite of avionics, ensuring a safe and comfortable flight experience. Take a look at the impressive lineup of cutting-edge equipment that enhances the aircraft's capabilities:

- 2x Garmin G600 TXi: These advanced flight displays provide intuitive and detailed graphical information, enhancing situational awareness for pilots.
- 2x Garmin GTX 330ES: These transponders offer enhanced Mode S surveillance capabilities, enabling precise tracking and identification in air traffic control systems.
- Garmin GTN 750 Xi and GTN 650 Xi: These touchscreen GPS/NAV/COMM units provide seamless navigation, communication, and approach capabilities, facilitating precise and efficient flight planning.
- Garmin GWX75: This weather radar system delivers accurate and real-time weather information, ensuring pilots can navigate around hazardous weather conditions.
- Garmin GMA 350C: This audio panel offers superior sound quality and clear communication, enhancing the in-flight experience for both pilots and passengers.
- Bendix King KN 63: This DME (Distance Measuring Equipment) provides accurate distance measurements to aid in navigation and approach procedures.
- Bendix King KR 87: This ADF (Automatic Direction Finder) offers reliable and precise directional information, assisting with navigation in areas without ground-based radio navigation aids.
- Bendix King KMD 850 MFD: This multi-function display provides valuable situational awareness information, including weather data, traffic information, and terrain mapping.
- Bendix King KRA 405B: This radar altimeter assists pilots in accurately determining the aircraft's height above the ground during approaches and landings.
- Bendix King KFC 325: This autopilot system enhances flight stability and reduces pilot workload by automatically controlling the aircraft's pitch, roll, and heading.
- Kannad 406 ELT: This emergency locator transmitter ensures rapid and precise search and rescue in the event of an aircraft emergency or crash.
- Golze ADL: This system enables access to vital aviation data and weather information through satellite communication, providing up-to-date situational awareness.

The PC-12's avionic systems, including the Garmin, Bendix King, Kannad, and Golze technologies, combine to create a powerful and reliable cockpit environment, empowering pilots with the tools they need for a smooth and secure flight.

# Interior.

Step inside the exquisite interior of the Pilatus and prepare to be captivated by its elegant design and luxurious features. The meticulously crafted cabin offers a harmonious blend of comfort and sophistication, ensuring an exceptional flying experience.

As you enter, you'll be greeted by a small cabin area adorned with beautiful light brown wood finishes. This welcoming space sets the tone for the rest of the interior, exuding warmth and refinement. The attention to detail is evident in every corner, showcasing the fine craftsmanship that has gone into creating this exceptional swiss-made aircraft.

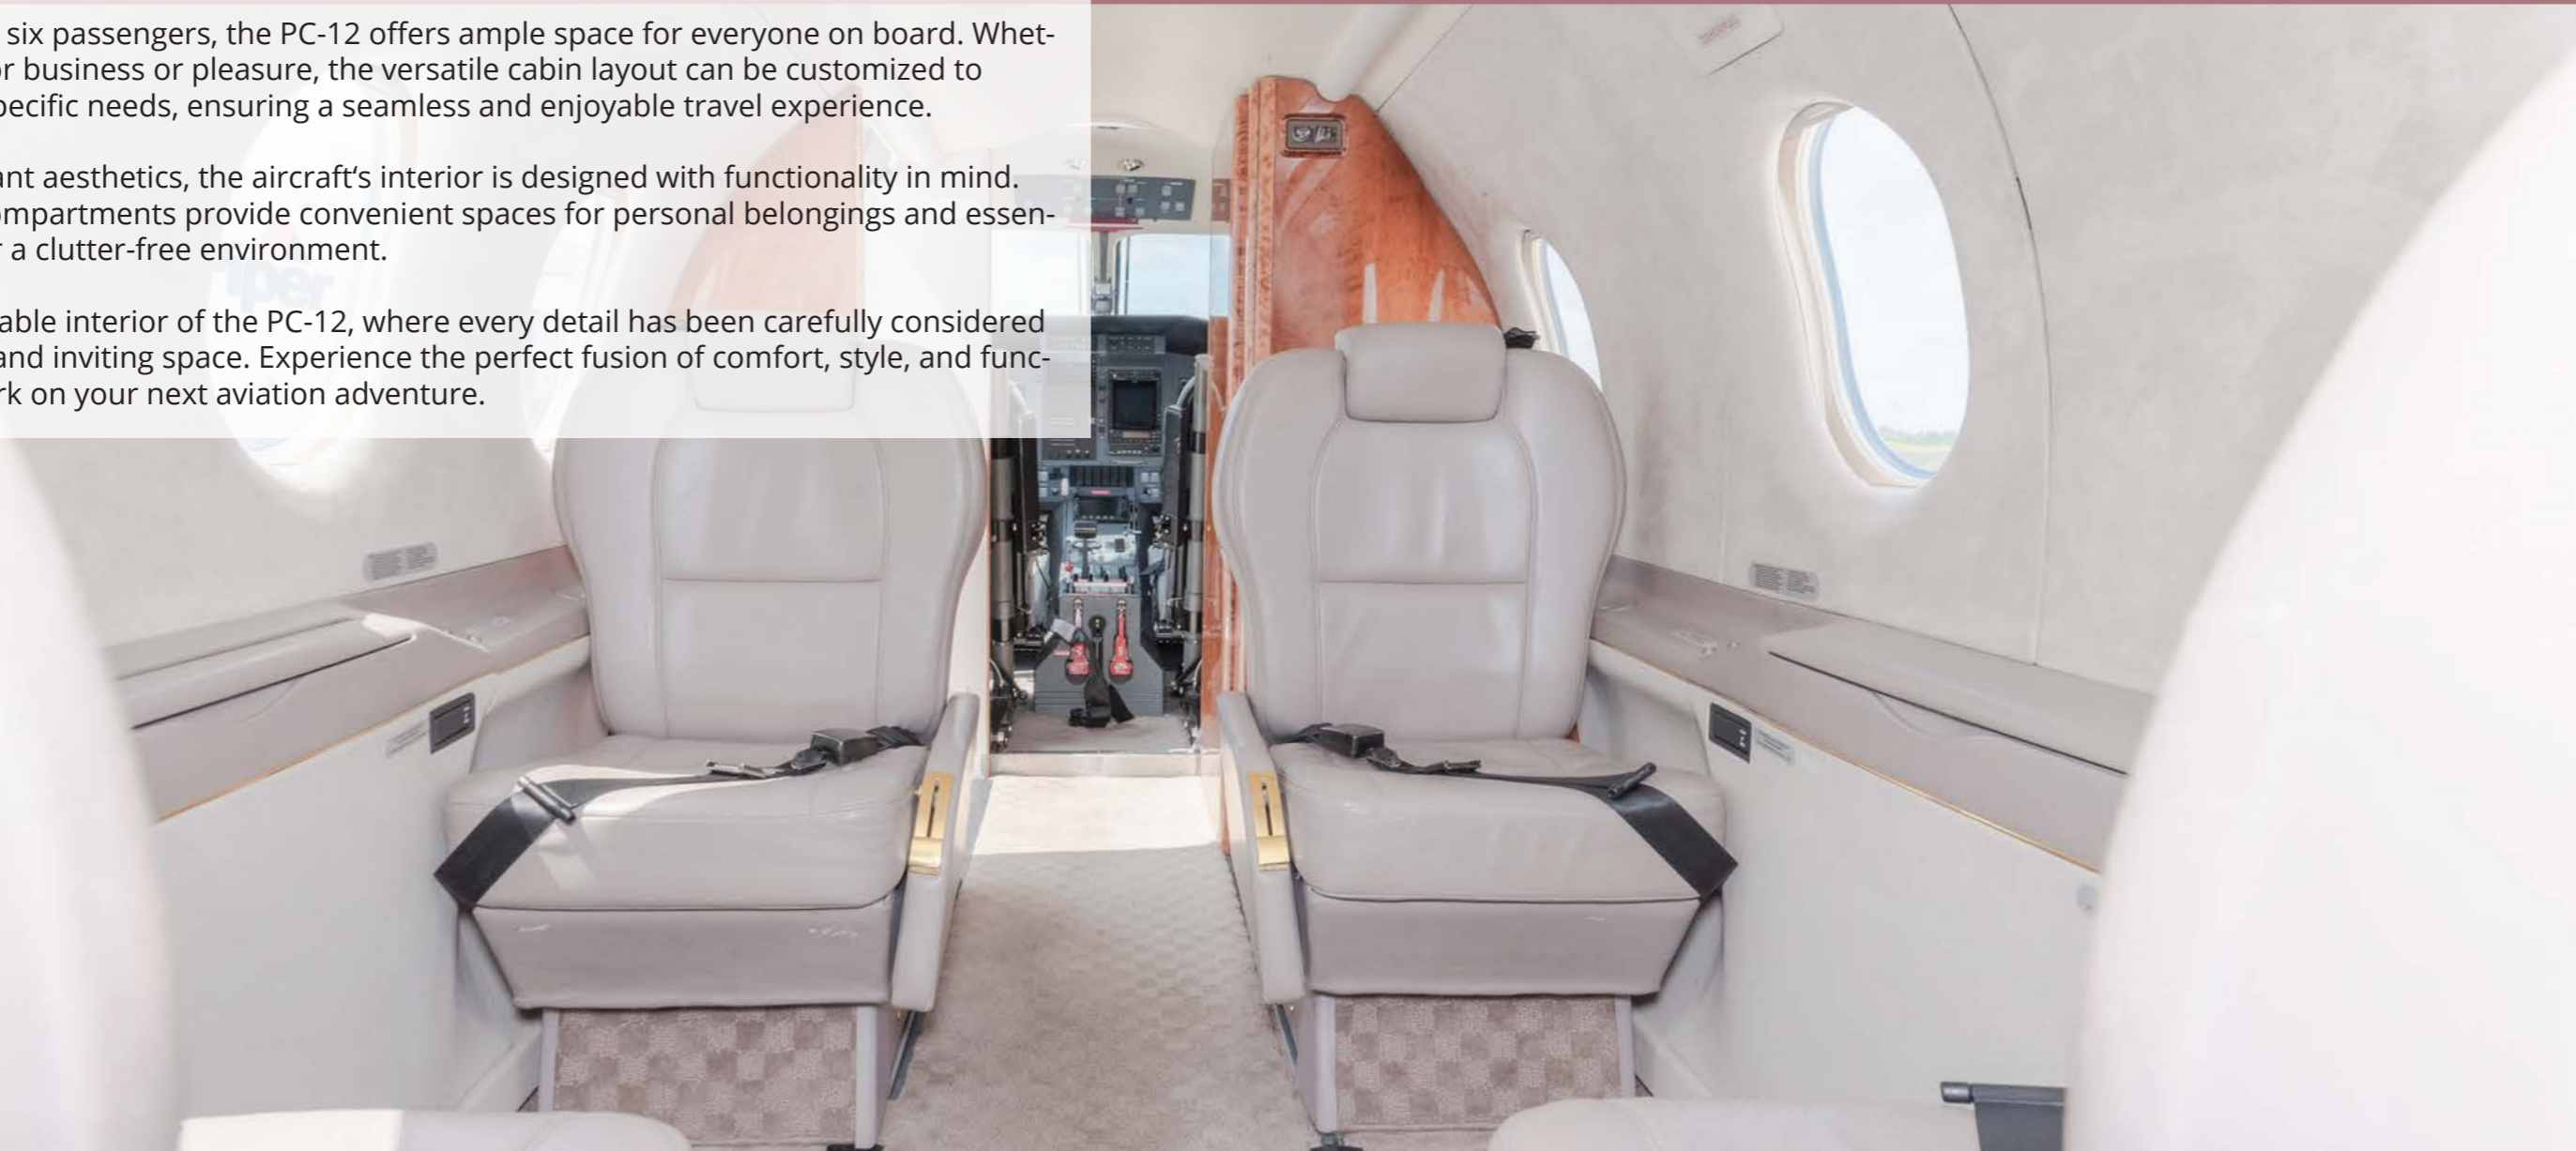

The seats, upholstered in light grey leather, provide a perfect balance of style and comfort. Whether you're embarking on a short journey or a long-distance flight, these plush seats will envelop you in pure relaxation, allowing you to enjoy the journey in utmost comfort.

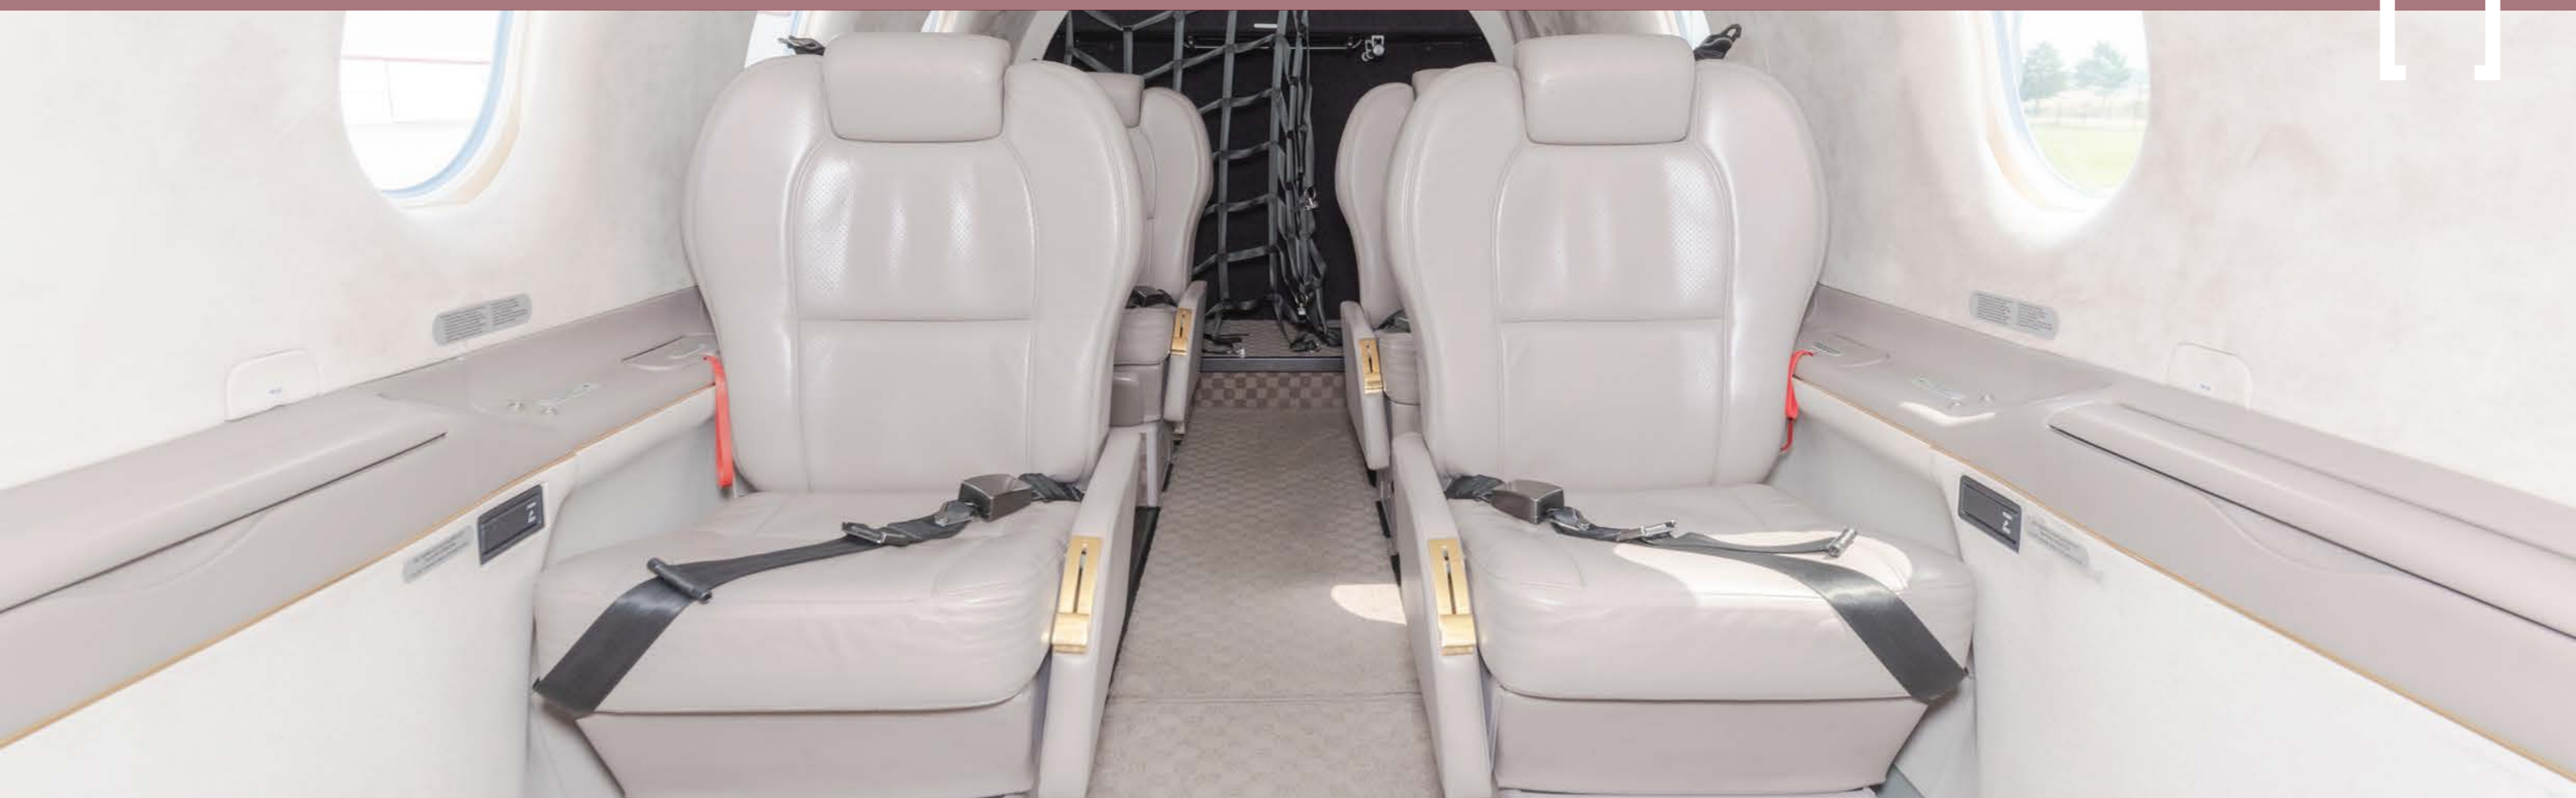

The well-maintained interior of D-FRAM radiates a sense of brightness and spaciousness. Natural light pours in through the large windows, creating an airy and open atmosphere. This expansive ambiance further enhances the overall flying experience, ensuring that every passenger feels at ease throughout the journey.

With seating for up to six passengers, the PC-12 offers ample space for everyone on board. Whether you're traveling for business or pleasure, the versatile cabin layout can be customized to accommodate your specific needs, ensuring a seamless and enjoyable travel experience.

In addition to its elegant aesthetics, the aircraft's interior is designed with functionality in mind. Thoughtful storage compartments provide convenient spaces for personal belongings and essential items, allowing for a clutter-free environment.

Indulge in the remarkable interior of the PC-12, where every detail has been carefully considered to create a luxurious and inviting space. Experience the perfect fusion of comfort, style, and functionality as you embark on your next aviation adventure.

# Maintenance.

When it comes to the maintenance of D-FRAM, rest assured that it has been meticulously cared for by the renowned team at Piper + Jet Maintenance. With a solid reputation for excellence, Piper + Jet Maintenance is the trusted name in aircraft servicing.

As a Pilatus Satellite Service Center, Piper + Jet Maintenance possesses extensive expertise and experience in maintaining Pilatus PC-12 aircraft. Our dedicated team of skilled technicians is well-versed in the unique intricacies of the PC-12 and is committed to upholding the highest standards of maintenance.

Throughout its operational history, the PC-12 has received regular, thorough maintenance checks and servicing by the expert hands at Piper + Jet Maintenance. From routine inspections to major overhauls, each maintenance task has been performed with meticulous attention to detail and a focus on safety and reliability.

At Piper + Jet Maintenance, we understand that proper maintenance is paramount to the continued performance and longevity of your aircraft. We utilize advanced diagnostic tools, state-of-the-art facilities, and genuine manufacturer-approved parts to ensure that your PC-12 is maintained to the highest standards.

If you have any questions regarding the maintenance history of this particular PC-12 or would like to have a comprehensive overview of the maintenance performed, please do not hesitate to contact us. Our knowledgeable team is more than happy to provide you with all the information you need to make an informed decision.

A Piper PC-12 aircraft, white with teal and gold accents, is parked on a tarmac in front of a large hangar with a red roof. The aircraft has the registration 'D-FRAX' visible on the tail. The sky is overcast with grey clouds.

# About Piper Germany

With a rich legacy spanning over 50 years, Piper Germany has firmly established itself as one of Europe's largest and most trusted service providers in general aviation. As the exclusive Piper dealer for Germany, Austria, and Switzerland, we take pride in delivering exceptional products and services to aviation enthusiasts and professionals alike.

At Piper Germany, we offer a comprehensive range of services tailored to meet your needs. Our state-of-the-art maintenance facilities, staffed by highly skilled technicians, cater not only to Piper aircraft but also to a diverse range of other aircraft models. We are committed to providing top-quality maintenance, repair, and overhaul services, ensuring the safety and optimal performance of your aircraft.

In addition to our maintenance expertise, Piper Germany serves as the parent company of the largest spare parts distributor for general aviation in Europe. With an extensive inventory of genuine parts, we ensure quick and efficient access to the components you require, minimizing downtime and maximizing your aircraft's availability.

**One of our specialized services is our premier aircraft broker service. If you are looking to buy or sell a pre-owned aircraft, our experienced team offers extensive knowledge, a vast network, and high-end media platforms to facilitate the process. We provide expert guidance, handling everything from market research and advertising to negotiations and documentation, ensuring a seamless and successful transaction.**

Count on Piper Germany to elevate your aviation experience through our commitment to excellence, unmatched expertise, and comprehensive range of services.

Contact us today to discover how Piper Germany can assist you with aircraft maintenance, spare parts, or our premium broker service, and let us help you reach new heights in aviation.
