500

The Exterior.

The exterior

The Piper M500's exterior is finished in a tastefully optional colour scheme, featuring a **metallic white top and a metallic dark blue bottom**.

This choice, not standard but selected for its subtle elegance, is accentuated with **silver stripes edged in white**. The propeller's **chrome spinner** contrasts with the black blades of the Hartzell prop, adding a modest, timeless yet distinctive touch to its overall appearance.

Now let's take a look at the details.

Details.

Specifications & Performance

Capable of cruising at a speed of **260 knots** and climbing at 1556 feet per minute, the M500 balances speed with efficiency.

It has a fuel capacity of 170 gallons, allowing for a **range of 1000 nautical miles** and a fuel consumption of 40 gallons per hour.

The aircraft supports a **usefull load of 1,690 lbs.** Its operational range makes trips from **Berlin to Mallorca**, as well as **Munich to Sylt**, both practical and enjoyable.

Whether it's facilitating a timely arrival at an important business engagement or transporting your family for a leisurely holiday retreat, the M500 stands ready to fulfill these roles with equal aplomb and efficiency.

Time

State

The Time State of this M500 is as commendable as its other features. With only **602 hours** since new (TTSN), the aircraft reflects moderate usage and prudent operation. The engine, a hallmark of reliability, is due for its overhaul at 3600 hours, leaving a substantial **3000 hours to TBO** (Time Between Overhaul). This provides ample time for extensive flying before any major maintenance is required.

The propeller, with a TBO of 4000 hours or six years, underscores the aircraft's long-term serviceability. Additionally, the possibility of a **TBO extension** – an extra 100 hours or 12 months, which can be applied twice – offers further flexibility and longevity.

These aspects of the aircraft's Time State not only demonstrate its current excellent condition but also promise continued robust performance for its new owner.

The image is a composite of two photographs. The top half shows the exterior of a white private jet with dark blue accents and the registration '99DF' on the side. The main cabin door is open, revealing a built-in airstair. The bottom half shows the interior of the aircraft, featuring cream-colored leather seats with dark stitching and a brown leather seatbelt. A brown carpeted floor is visible at the bottom. A diagonal white line separates the two images, and a semi-transparent maroon shape is overlaid on the right side. The text 'Now, let's take a look inside..' is written in white, bold, sans-serif font across the middle of the image, with each word in a separate white rectangular box.

The Interior

Inside, the M500's cabin is designed for comfortable travel. The light beige full leather seats, complemented by dark brown accents, create a tranquil and welcoming space.

Dark brown carpets with 'M500' embroidery and dark wood elements like the foldable table contribute to a serene and inviting atmosphere, ideal for both short hops and longer journeys.

The aircraft's well-maintained interior is a clear reflection of the previous owners' dedication to its care. Their meticulous attention to detail and commitment to preserving its condition are evident in every aspect of the cabin's presentation. This level of care ensures not only a pleasing aesthetic but also speaks to the overall integrity and longevity of the M500, making it a prudent choice for its future owner.

Cockpit

A detailed view of the Garmin G1000 avionics cockpit panel. The central display shows a synthetic vision (SVT) display with a horizon line, altitude, and various flight parameters. To the left, there are engine gauges including torque and oil pressure. To the right, there are communication and navigation controls, including a COM frequency selector and a range knob. Below the main display, there are various status lights and buttons for systems like the cabin pressure dump and ECS cabin comfort.

The cockpit, equipped with the **Garmin G1000 avionics suite**, offers a reliable and user-friendly interface, despite not being the latest technology. Its ease of use and proven reliability make it well-regarded among pilots. The aircraft also features **additional options such as the Awareness, Weather, and International packages**, enhancing its operational readiness and safety.

Enhanced by the Awareness Package, it includes SVT **Synthetic Garmin Vision**, **TAWS-B**, a secondary **GTX 33 ES Digital Transponder**, and the **GTS 825 Traffic Advisory System**. The Weather package contributes the GDL 69A Sirius XM Satellite Weather, GRC 10 remote, and **L3 WX-500 Stormscope**, ensuring comprehensive environmental awareness. The International Package, featuring **GSR 56 Iridium**, **DME BendixKing KN63**, and the **GTX33D Diversity Digital Transponder**, along with the ADF Becker ADF-3500 and the United Kingdom Lighting Package, further augment the aircraft's global capabilities.
