The Exterior.

The exterior

The timeless allure of the Meridian's exterior is characterized by a **classic white top color**, complemented by a **deep blue bottom hue**, adorned with **accent stripes in a warm, copper-like shade**. These stripes elegantly stretch from the air inlets of the turbine, behind the propeller, to the aft of the aircraft.

With over 1500 hours of flight time accumulated over its 15-year lifespan, the paint displays minor signs of wear, yet remains in **commendable condition**. Both the propeller and chrome spinner exhibit good condition, reflecting **meticulous care and maintenance**.

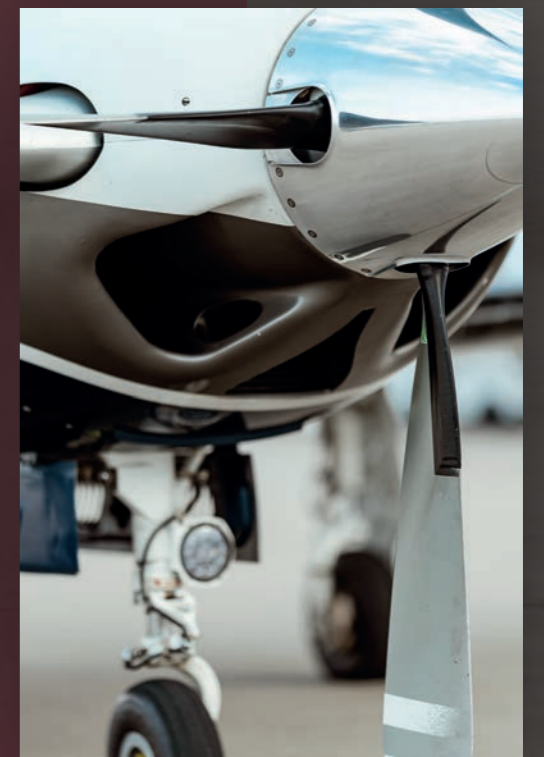

The aircraft showcases a well-preserved exterior, with **no visible signs of corrosion**, attesting to its attentive upkeep.

Now let's take a look at the details.

Details.

Specifications & Performance

The **Meridian** is celebrated for its efficiency and reliability. Boasting 500 shaft horsepower and a **fuel burn rate of just 40 gallons per hour**, this aircraft offers an impressive range of approximately **1000 nautical miles** at a cruising speed of around 240 knots. With a maximum speed of 262 knots, it delivers swift performance. During takeoff, the PA46 can **climb at a rate exceeding 1,500 feet per minute** until it reaches its maximum altitude of 30,000 feet with RVSM, or 28,000 feet otherwise.

Recognized as the most cost-efficient aircraft in its class, the Meridian represents a savvy investment choice for discerning buyers.

Time

State

In its brief yet notable 15-year lifespan, this Meridian has logged a mere **1560 flight hours since its delivery in 2008**. Recent completion of Maintenance **Events I & II in February 2024**, coupled with a valid **Airworthiness Review Certificate until January 2025**, underscores its diligent maintenance history.

Noteworthy is its clean track record, free from major accidents or incidents, save for a tail strike incident during taxiing in Amsterdam (not during takeoff). This incident underwent thorough inspection by Piper + Jet Maintenance, with comprehensive documentation readily available.

The image shows the interior of a Meridian aircraft. Two cream-colored leather seats with grey seatbelts are visible. The word "Meridian" is embroidered on the headrests of the seats. A dark red diagonal graphic element is overlaid on the image. In the top left corner, there is a white text box with the text "Now, let's take a look inside...".

Interior.

The Interior

The interior of the Meridian exudes elegance, featuring a harmonious blend of luxurious leather, plush carpets, and refined accents in black. The seats and fuselage trimmings are adorned in **light beige leather**, imparting a bright and inviting ambiance, accentuated by a very light headliner. Adding depth to the interior, contrasting **brown carpets** lend a touch of sophistication. Both the carpets and leather seats are impeccably maintained, **free from any signs of wear such as tears, holes, or broken stitches.**

Adding a modern flair, the cupholders and ports are finished in **matte black**, offering a sleek and contemporary aesthetic. Completing the ensemble, the foldable table in the rear showcases a stone-inspired finish, presenting in **pristine condition**, as if brand new.

In total, the aircraft can accommodate six individuals: **two pilots and four passengers.** Additional storage space for luggage is conveniently located behind the rear seats, providing ample room for approximately four carry-on pieces. This generous capacity ensures there's more than enough space for a quick weekend getaway or the next business trip.
